Chapter 1

About this release

Kofax AutoStore Client for Fujifilm AIP is an AutoStore client for Kofax ControlSuite. The Fujifilm AIP component allows you to capture documents from a Fujifilm device that is enabled for custom services (AIP) and send the documents to route destinations that are supported by the Workflow server.

This client supports the Fujifilm AIP 7 platform and embedded web browser 5. Additional features include:

- Support for Tree, List, Text, Checkbox, Numeric, Date, and Lookup List field types to provide document indexing flexibility
- Allow different set of forms to be used with groups of devices
- Simplified creation of forms for sending scanned documents to an email address destination or to a folder destination
- Share forms with the save/load form from template functions
- Allow only certain users to have access to a form
- Extensible forms through VB.NET
- Windows authentication at the MFP panel or custom authentication methods

Please read this document carefully, as it contains information that might not be included in other Fujifilm AIP documentation.

Version information

The Fujifilm AIP version 1.0.0 client is available in the ControlSuite 1.3.0.3.0.86 build.

System requirements

For information on supported operating systems and other system requirements, see the [Kofax AutoStore Client for Fujifilm AIP Technical Specifications](#) document on the Kofax ControlSuite 1.4.0 [Product Documentation](#) page. The document is updated regularly, and we recommend that you review it carefully.

Chapter 2

Known issues

Delete App button does not remove Fujifilm AIP

1842309: After logging into the device web page as an administrator, go to **Apps** and select the Fujifilm AIP application. When you click the **Delete App** button, the Fujifilm AIP application is still available.
