Chapter 1

About the Unified Client for Brother

The Kofax Unified Client for Brother adds print and capture capabilities to Brother devices through AutoStore and Equitrac while still using device-specific features.

Specific hardware and software compatibility requirements are outlined in this document. You must meet these requirements to support the Unified Client for Brother. These requirements specifically list the needs of the Unified Client for Brother and do not include any additional requirements for other components you might use in your system.

Chapter 2

Product requirements

Product components
