Chapter 1

About the Unified Client for Canon

The Kofax Unified Client for Canon adds print and capture capabilities to Canon devices through AutoStore and Equitrac while still using device-specific features.

Specific hardware and software compatibility requirements are outlined in this document. You must meet these requirements to support the Unified Client for Canon. These requirements specifically list the needs of the Unified Client for Canon and do not include any additional requirements for other components you might use in your system.

Chapter 2

Product requirements

Product components

Specification	Description
Supported devices	The Unified Client will function with the Canon MFP devices that support the Java SE MEAP framework.
