Chapter 1

About the Unified Client for HP

The Kofax Unified Client for HP adds print and capture capabilities to HP devices through AutoStore and Equitrac or Output Manager while still using device-specific features.

Specific hardware and software compatibility requirements are outlined in this document. You must meet these requirements to support the Unified Client for HP. These requirements specifically list the needs of the Unified Client for HP and do not include any additional requirements for other components you might use in your system.

Chapter 2

Product requirements

Product components
