Requirements for Kofax ControlSuite Cost Recovery Connector

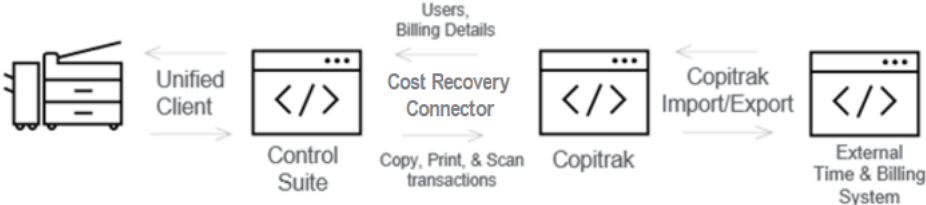

Copitrak 3.4.0 includes ControlSuite Cost Recovery Connector, which is delivered with Copitrak 3.4.0 but installed as part of ControlSuite. Configuration, scheduling, and logging for the Cost Recovery Connector are performed within ControlSuite.

Kofax ControlSuite Cost Recovery Connector transfers data for copy, print and scan transactions from ControlSuite to Copitrak for cost recovery. With this connector, account codes and descriptions from Copitrak can also be displayed as menu selections in ControlSuite.

Specification	Description
Kofax Products	Kofax ControlSuite 1.4.0.1 or higher
Required Third-Party Technologies	Microsoft ASP.NET Core 6.0 Windows Hosting Bundle or higher

Copitrak and ControlSuite can be installed without requiring additional licenses for supporting software, such as Windows Server or SQL Server, as long as the hardware has sufficient computing power and network bandwidth.

However, if ControlSuite is installed on a separate instance of Windows Server, Microsoft ASP.NET Core 6.0 Windows Hosting Bundle (or higher) is required only for the instance where ControlSuite is installed.
