Chapter 1

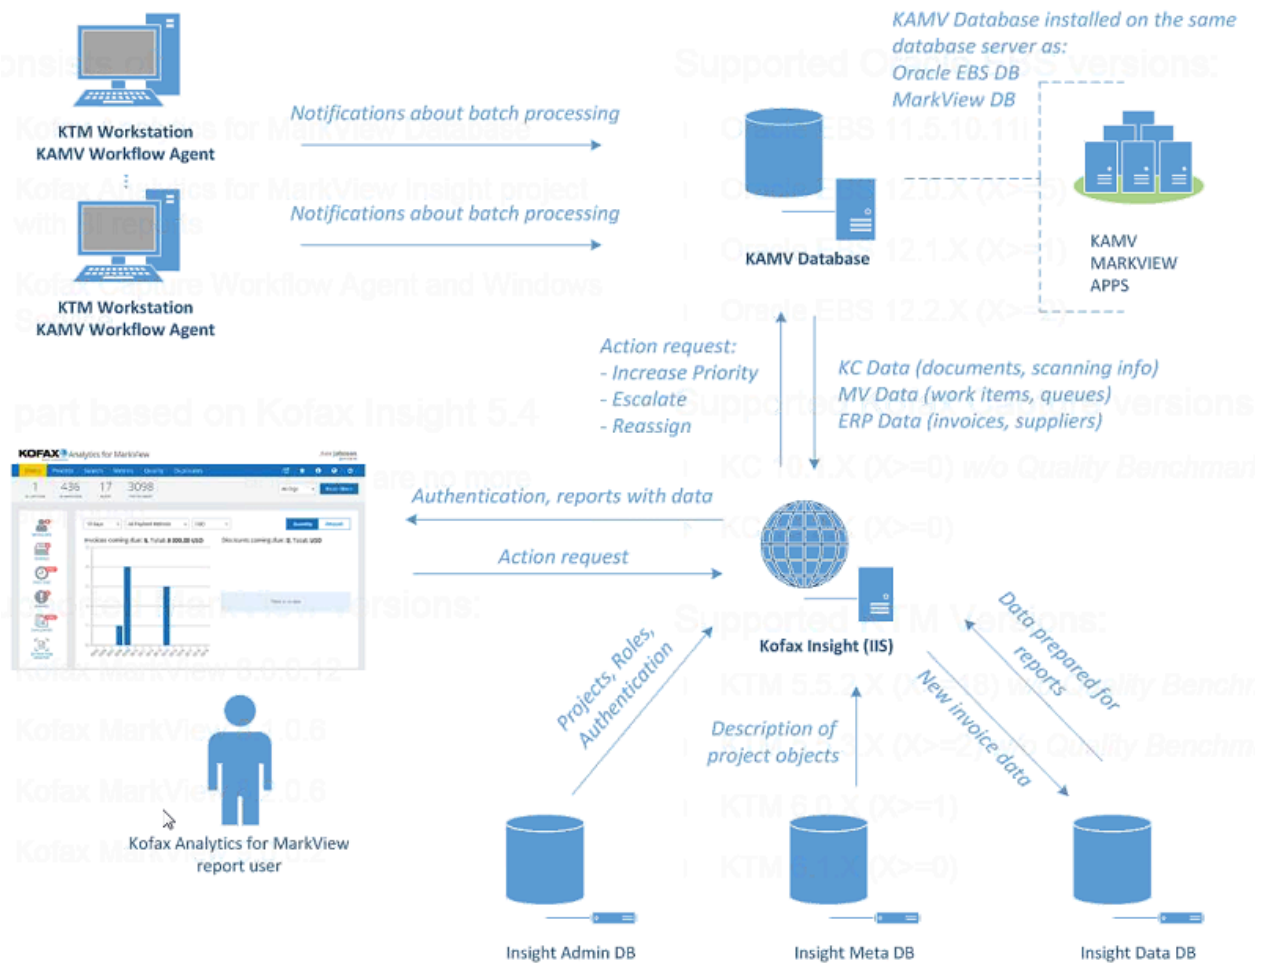

About Kofax Analytics for MarkView technical specifications

Kofax Analytics for MarkView (KAMV) is a reporting product with actionable analytics options built on the Insight product platform that contains reports and features specifically designed for the MarkView invoice processing product. The technical specifications in this document are specific to Kofax Analytics for MarkView, version 1.2.

A required amount of memory and disk space is provided. You must meet these requirements to support your Kofax Analytics for MarkView system. These requirements specifically list the needs of Kofax Analytics for MarkView and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.
