Preface

Kofax ReadSoft Collector is an extension to ReadSoft Invoices that allows you to use capture data from incoming emails (for both image and XML file formats).

This document provides information about the technical specifications required to install ReadSoft Collector with ReadSoft Invoices version 6.2.0.

Product requirements

This chapter describes the requirements for ReadSoft Collector.

Specification	Description
Software	• .NET Framework 4.7.2 • INVOICES 5-8 SP2 or higher
Client Operating system	• Microsoft Windows 10 • Microsoft Windows 8 • Microsoft Windows 7
Server Operating system	• Microsoft Windows Server 2019 • Microsoft Windows Server 2016 • Microsoft Windows Server 2012 and 2012 R2 • Microsoft Windows Server 2008 R2 • Microsoft Windows Server 2008 (32-bit or 64-bit version)
DBMS	• Microsoft SQL 2005 • Microsoft SQL 2008 • Microsoft SQL 2012 • Microsoft SQL 2014 • Microsoft SQL 2016 • Microsoft SQL 2019* Both 32-bit and 64-bit versions are supported.
Administrator	This role requires administrator privileges for ReadSoft Invoices Manager, Interpret module workstations, and SQL Server.
User	This role requires the following privileges: • Retrieve email from mail servers. • Store mail-attachment files on disk. • Store log files in the log folder.
Mail account	IMAP, MAPI, EWS, or EWS with OAuth mail protocol ** must be supported.

* The latest Service Pack and updates are recommended. For ReadSoft Invoices and Microsoft SQL Server hardware and software requirements, refer to the ReadSoft Invoices and SQL Server documentation.

** An IMAP, MAPI, EWS, or EWS with OAuth mail protocol is necessary to retrieve invoices by email using ReadSoft Collector. You must set up email rules in your mail client to automatically move the mail messages containing invoices to the ReadSoft Collector source folder. It is recommended to create the source, processed, and error folders in the mailbox before installing ReadSoft Collector.

To receive the incoming emails from ReadSoft Collector:

- Install an email application on the system before specifying a MAPI email account in the ReadSoft Collector input configuration.
- Log in to the email account.
- Ensure you have the required privileges to log in to the email account. A domain or local administrator rights may not be sufficient.
