

Kofax SafeCom Mobile Print

Release Notes

Version: 4.3.0

Date: 2021-04-09

The KOFAX logo is displayed in a bold, blue, sans-serif font. The letters are thick and closely spaced, with a consistent weight throughout. The 'K' and 'F' are particularly prominent due to their size and the sharp angles of their strokes.

About this release

The release notes give you late-breaking information about Kofax SafeCom Mobile Print 4.3.0. Please read this document carefully, as it contains information that is not included in other documentation. To view the *Administrator's Guide*, visit the [Kofax SafeCom Product Documentation](#) site.

Version information

This Kofax SafeCom Mobile Print product is identified by build number 4.3.0.0.0.1103, which you can access from the Kofax SafeCom Mobile Print Web Interface.

System information

For information on supported operating systems and other system requirements, see the *Kofax SafeCom Mobile Print Technical Specifications* document on the [Kofax SafeCom Product Documentation](#) site. The document is updated regularly, and we recommend that you review it carefully to ensure success with your Kofax SafeCom Mobile Print product.

What's new

The following new features and enhancements are included with Kofax SafeCom Mobile Print 4.3.0.

- Support for Windows 2019 Server
- Support for Office 365 Modern Authentication OAuth2 for Email Print
- Default keystore that includes new SSL certificate for new installations
- Update to jQuery version 3.5.1

Changes in behavior

Kofax SafeCom Mobile Print 4.3.0 includes the following product changes:

- Deprecation / discontinued support for Google Cloud Print as of January 1, 2021
- Discontinued support for uploading or attaching HTML or HTM files
- Changed Outgoing Email Settings to hide stored passwords in form
- Updated LDAP authentication configuration to require a password to modify the LDAP server

Resolved issues

This section lists previously reported issues that are now resolved.

Issues resolved in Kofax SafeCom Mobile Print 4.3.0
Issue managing secondary servers in cluster configurations
Issue with secondary servers failing to obtain licenses from primary Enterprise servers
Issue printing web page due to "invalid protocol" error
Issue with non-RFC conformance in AirPrint response
Enhanced security of Web UI to prevent XSS
Issue with print jobs sent to external document services not expiring on failed print
Issue with unexpected PortType error with remote printing configuration if remote printers were misconfigured
Issue with Web Admin single-sign-on between primary and secondary cluster nodes
Improved error handling of Web URL printing if feature is disabled
