About product technical specifications

Kofax SafeCom is a print management solution used to secure print workflows and lower cost of ownership of a print solution. The technical specifications in this document are specific to SafeCom 10.530.0.

A required amount of memory and disk space is provided. You must meet these requirements to support your SafeCom system. These requirements specifically list the the needs of SafeCom and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.

Product requirements

Product component

| Specification | Description |
