Overview

Ephesoft Transact uses context-driven productivity to scan and extract data from documents that arrive in formats such as paper, fax, and email attachments. Ephesoft Transact automates the end-to-end document processing workflow with minimal operator interaction. The technical specifications in this document are specific to Ephesoft Transact 2023.1.00.

To support your Ephesoft Transact system, verify that the requirements listed in this document are met, including the amount of memory and disk space. Ephesoft Transact is certified with a wide range of operating systems, databases, and third-party integrations. Other environments that have not been tested may still be compatible. These requirements apply specifically to Ephesoft Transact and do not include any amount of memory or disk space required for the operating system, environment, or other software that may be running on the same server or workstation.
